Telescopic Upright System

Part Number: **TEL**

The Telescopic Upright System extends up to 30" above the Top Rail in 1" increments and stores between the Back Panels of an Island or Wall Section.

Product Details:

- Stores between the Back Panels and extends up to 30" above the Top Rail in 1" increments
- Locking Pin (included with Upright) stores in the Top Cap when not in use
- Section length must be all 3' or 4', no combination of both in same run
- Will NOT work with Slotwall or Wire Grid Backs
- When ordering sections, specify "T" rail type
- The load capacity per Telescopic Upright section is 200 lbs per side no matter how many Shelves are used on this section. This load capacity is reduced to 60 lbs per Telescopic Upright section if used on a Wall Section with Backs installed on one side only.
