Impulse Queuing System

Part Number: IQ

The Impulse Queuing System is a stable and functional queuing system that reduces perceived checkout wait time for shoppers by extending the shopping experience with more merchandising opportunities. Combine accessories to customize your configuration. Easy to assemble without using additional tools.

Product Details:

- Reduces perceived checkout wait times by extending the shopping experience
- Assemble in multiple configurations to meet the needs of store space
- Accepts most standard Lozier accessories
- Easily assembled without the use of additional tools
