

INSTALLATION INSTRUCTIONS

MERCHANDISER PANEL, FULL HEIGHT, W/LEVELERS

TOTAL SHELF LOAD CAPACITY FOR ENTIRE PANEL = 4,400 in/lbs (No stabilizer)
8,000 in/lbs (With stabilizer)

- STEP 1:** Install top mounting clip on rear of merchandiser panel with #10 x 3/8 self-tapping screws (see Figure 1).
- STEP 2:** Install loose base angles onto base end trims of gondola. Small opening of base angle goes over base end trim.
- STEP 3:** Lift merchandiser panel and lower it onto base angles and engage top mounting clip in top lance of uprite. Base angles should be fully seated over top of base end trim (see Figure 2).
- STEP 4:** Adjust leveling legs of merchandiser panel to level unit (see Figure 3).

NOTE: If top stabilizers were ordered for heavy loads, see top stabilizer instruction for assembly after installing merchandiser panel. Complete this installation before merchandising store.
